DETAILED ACTION

REPEATED REJECTIONS

1. The 35 U.S.C. 103(a) rejection of Claims 23 – 49 as being unpatentable over Lind et al (U.S. Patent Publication No. 2001/0003624) in view of Agouri et al (U.S. Patent No. 4,126,648), of record on page 2 of the previous Action, is repeated.

ANSWERS TO APPLICANT'S ARGUMENTS

2. Applicant's arguments regarding the 35 U.S.C. 103(a) rejection of Claims 23 – 49 as being unpatentable over Lind et al (U.S. Patent Publication No. 2001/0003624) in view of Agouri et al (U.S. Patent No. 4,126,648), of record in the previous Action, have been carefully considered but have not been found to be persuasive for the reasons stated below.

Applicant argues, on page 6 of the remarks dated August 30, 2007, that the rejections are improper because Lind et al discloses at least three layers, in which at least one layer is a barrier layer, described at paragraph 0014.

However, as stated on page 2 of the previous Action, Lind et al is not limited to a film comprising a barrier layer; Lind also discloses a film comprising one layer comprising a single layer comprising an ethylene polymer (paragraph 0013) or a multilayer film comprising ethylene polymers made with a metallocene catalyst (paragraph 0013) for providing increased strength and faster bag making speeds (paragraph 0013). Alternatively, the film may also comprise a barrier layer as disclosed in paragraph 0014, but paragraph 0014 is not mentioned in, and is not relevant to, the rejection.

Application/Control Number: 10/803,318

Art Unit: 1794

Applicant also argues on page 6 that Agouri et al teach 55 - 85% low density polyethylene by weight and 45 - 15% high density polyethylene and / or polypropylene by weight; Agouri et al, Applicant argues, therefore do not teach the percentages of low density polyethylene and high density polyethylene alone.

However, because the percentages are taught by Agouri et al, the percentages of low density polyethylene and high density polyethylene alone are taught by Agouri et al.

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Application/Control Number: 10/803,318 Page 4

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marc A Patterson whose telephone number is 571-272-1497.

The examiner can normally be reached on Mon - Fri 8:30 AM - 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rena Dye, can be reached on 571-272-3186. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
